## PERSONAL SUMMARY

A meticulous problem solver by nature, I love programming and coding but still also enjoy and practice design, content writing and working with others to share knowledge and experience. Full of drive and positive emotions to confidently approach new environments and tasks.

## ACADEMIC QUALIFICATIONS

**Computer Science BSc (Hons)** (2015)  
University of Worcester

**HND Higher National Diploma** (2012-2014)  
in Computing (Software Development)  
Worcester College of Technology

## Work Experience

**Role:** Software Developer  
**Where:** DB Systems Ltd,  
Tewkesbury IT & AV Rental  
company  
Working with DB Systems company allowed me to gain experience working alongside software developers to test the software, producing graphical components, ActionScript assistance, and took part in project research.

**Role:** Project Manager  
**Where:** Worcester College of  
Technology/ Catering  
Department  
Creating an upgrade for the food ordering system database. Working agile with the client to implement a large food ordering system to be robust, future-proof and meet clients' needs for the catering department.

## INTERESTS AND ACHIEVEMENTS

My academic background has given me many transferable skills and preparation for a wide range of careers including web design and development, system analysis, e-business, development, web architecture, user experience, e-marketing, software development, IT services and support.

Through the years I've gained many technical and personal skills that I use in everyday life. These inspire me to learn more and constantly improve myself. Presentations and group work have helped me advance my team working and language skills.

In my personal life I enjoy traveling, reading, digital graphics, rugby, badminton, cars, computer ingenuity, technology updates.
